

SYSTEM AND METHOD FOR CONTENT DISTILLATION

Steve X. Chen and Ken Chen

ABSTRACT

5 A system and method is provided for transferring information, such as Internet
content. The system may provide freeform browsing on a wireless limited-display
device, Internet content distillation, targeted content delivery based on a user's location,
one-hop delivery of Internet content to a wireless limited-display device, Internet content
flagging and synchronization of information between a wireless limited-display device
10 and another device such as a personal computer (PC).
